

THE VALUE OF OUTREACH AS ARTICULATED BY ATTENDEES

University of Victoria, Earth and Ocean Studies

- *“Your presentation was very good, we loved it. It was very expository and informative. It was very well laid out and the delivery was really good.” Ayo Kuponiyi, PhD student*
- *“I saw great value in your presentation. It was a good overview and led to some larger picture discussions.” Curtis Evans, Project Manager, SEOS*
- *“Your discussion of the environmental concerns and mitigation practices of unconventional oil and gas development was very impressive. It provided a great overview of the unconventional oil and gas industry in British Columbia.” Yaomin Jin, BC MEMPR*
- *“Your presentation was clear and concise. It did however raise potential environmental concerns. However you explained those issues and had great discussion on them.” Guy Makonga, BC MEMPR*

University of Calgary, Political Science (Politics of Energy in Alberta)

- *“An excellent presentation with a strong emphasis on water. We definitely would like you to return to campus for another presentation.” Ted Morton, U of C*

Vancouver Island University, Geology

- *“Your presentation was definitely appreciated. You stimulated lots of discussion and questions. Most of the students have a strong desire to learn more, especially around the cumulative effects of fracking on bedrock integrity and hydrology.” Professor Tim Stokes*

Western University, Petroleum Geology

- *“I thoroughly enjoyed both talks and appreciated how up to date the content was. I found it interesting to see the effects that politics is playing on hindering the energy industry, and I am glad that CSUR is there to help educate people. It is probably a huge task but I sincerely hope you’ll be able to reach more people before it’s too late for Canada.” Karen Gray, TA in Petroleum Geoscience*

British Columbia Oil and Gas Commission

- *“The material was presented in a very clear and concise fashion and gave a good overview of the processes involved in unconventional resource extraction. Overall, a very good summary of the unconventional resource renaissance.” Jeff Johnson, Supervisor, Petroleum Geology*
- *“The presentation had great value as there is a vacuum and many misconceptions regarding the environmental impacts of unconventional resource development, and how these impacts are identified, and reduced or mitigated. Your format and discussion session was helpful in addressing some of these issues.” Mark Hayes, Technical Leader*
