

The power to *Connect*. The power to *Convene*.
The power to *Inform*.

"I think that CSUR is one of the few Professional Societies that caters to all technical disciplines from Geoscience to Engineering and everything in between. CSUR membership includes Operators, Service Companies, Government Agencies and Academia. My Company sees value in attending the monthly technical lunch talks and also periodic day-long topical conferences on matters important to the industry and public alike such as Montney Day and the Induced Seismicity Workshop. We have even had the opportunity to meet with Government officials at sessions set up by CSUR in their offices – just a part of their role as an objective advocate for their members.

*John Nieto, Chief Technology Officer
Canbriam Energy Inc.*

With a strong emphasis on improving public awareness, CSUR is the only society to focus exclusively on the full breadth of unconventional resource development, and does so by utilizing a multi-disciplinary approach.

WHO WE ARE:

The Canadian Society for Unconventional Resources (CSUR) is the leading technical voice for unconventional resources in Canada. Our focus is on providing members with the most current information regarding issues of relevance to our sector. We are uniquely qualified to do so because of our strong ties to all sectors related to unconventional resources; our broad-based membership is testimony to that.

WHY US:

🍁 TECHNICAL FOCUSED

We are a fact-based organization with a deep understanding of all aspects related to exploration, development and production of unconventional resources.

🍁 INCLUSIVE

We have strong ties to the entire spectrum of interested stakeholders, and interact and engage with them constantly. These groups are not just **industry** but **academia, governments, environmental groups, consulting firms** and the **public**.

🍁 DIVERSE MEMBERSHIP

We are a multi-disciplinary organization with a focus on bringing together the entire spectrum of technical as well as non-technical disciplines. This includes **geologists, engineers, financial, land, environmental** and **executive roles**. This diversity allows us to address a wide range of important issues.

HOW WILL YOU BENEFIT:

TECHNICAL INFORMATION

COLLABORATIVE

- Industry
- Universities
- Governments
- Stakeholders

MULTI-DISCIPLINARY

- Engineers
- Geologists
- Finance
- Land & Environment
- Business

If you are involved with or desire a better understanding of unconventional resource development in Canada then CSUR provides the conduit for such information. We are at the nucleus for dissemination of fact-based technical information. The diversity and the breadth of our membership, our events and our publications are testimony to this.
