

CANADA – JAPAN

September 27, 2019

Embassy of Canada to Japan

7 Chome 3-38 Akasaka
Minato City, Tokyo 107-0052

AGENDA

9:00 AM

Registration and coffee with light breakfast

- **Nori Saito**, Alberta Japan Office, Master of Ceremonies

9:30 AM

Welcome

- **Tracy Reynolds**, Minister (Commercial), Embassy of Canada

9:40 AM

Opening Panel - Canada's LNG Industry and Investment Potential

Canada aims to have one of the cleanest, most environmentally responsible natural gas industries in the world and when combined with the use of hydroelectricity, LNG exported from Canada's west coast to Asia will be the world's cleanest LNG. How will the continued development of Canada's natural gas export sector not only fit within global climate policies but assist in reducing global emissions of carbon dioxide? How are the federal government and the provinces of Alberta and British Columbia working together to realize this opportunity?

Moderator:

- **Bill Whitelaw**, President and CEO, JWN Energy

Panelists:

- **Shawn Tupper**, Associate Deputy Minister, Natural Resources Canada
- **Ron Hoffmann**, Alberta Senior Representative for the Asia Pacific Basin
- **Dave Nikolejsin**, Deputy Minister, British Columbia Ministry of Energy, Mines and Petroleum Resources

10:00 AM

Keynote - Role of Canadian Natural Gas in a Low Carbon World

Natural gas is one of the mainstays of global energy: worldwide consumption is rising rapidly and in 2018 gas accounted for almost half of the growth in total global energy demand. Gas plays many different roles in the energy sector and, where it replaces more polluting fuels, it also reduces air pollution and limits emissions of carbon dioxide. But how widespread and durable is this role in clean energy transitions and how does Canada stack up compared to other countries as a supplier?

- **Keisuke Sadamori**, Director for Energy Markets and Security, International Energy Agency

10:20 AM

Keynote - Indigenous Partnerships

Canadian LNG projects have committed to partnering with Indigenous communities to foster a better understanding of each other's aspirations and concerns. Together the industry and communities are prospering by identifying opportunities for investment and collaboration.

- **Karen Ogen-Toews**, CEO, First Nations LNG Alliance

10:40 AM

Coffee and Networking

10:55 AM

Canadian Value Chain: Upstream-Midstream-Downstream

Hear from the major players who ensure natural gas supply from the wellhead to burner tip across multiple Canadian provinces. How are companies working together along the entire value-chain to get these mega-projects built? What steps are they taking to address carbon emissions concerns, competitiveness and community engagement?

Moderator:

- **Bryan Cox**, President and CEO, BC LNG Alliance

Panelist:

- **Jason Kearns**, Director of Commercial and Business Development, Enbridge
- **Greg Kist**, President and CEO, Rockies LNG
- **Marty Proctor**, President and CEO, Seven Generations Energy
- **Rod Maier or designate**, Kitimat LNG/Chevron

11:40 AM

Japan's Experience Partnering with Canadian Energy Projects

Japanese companies have been working in Canada for years and have built lasting relationships with Canadian companies, officials and Indigenous peoples. What is your experience working with Canadian partners and investing in the Canadian energy industry? What opportunities are on the horizon?

- **Hiroyuki Mori**, Director, Business Coordination Division, Japan Oil, Gas and Metals National Corporation (JOGMEC)

12:00 PM

Closing Remarks

- **Dan Allan**, President and CEO, Canadian Society for Unconventional Resources

12:15 PM
to
2:00PM

Lunch and Networking
