

June 2020

CSUR is excited to welcome two new Directors to its 2020-21 Board of Director's: Jennifer Keturakis and Dr. Jennifer Winter. They bring decades of knowledge in the key areas of environmental science and public policy, respectively. Their areas of expertise are vital to our strategies on energy transition over the next several decades.

Jennifer Keturakis is the Corporate Vice President at Integrated Sustainability and has over 20 years of professional experience working in the regulatory, sustainability, and environmental fields. Her range of experience spans from environmental consulting, to reviewing and assessing applications and compliance, to operational programs. As a former provincial regulator, Jennifer has comprehensive legislative experience including in-depth knowledge of the Oil and Gas Conservation Act, the Oil Sands Conservation Act, the Environmental Protection and Enhancement Act, the Water Act, and the Public Lands Act.

Dr. Jennifer Winter (PhD, Calgary) is an Assistant Professor of Economics and Scientific Director of the Energy and Environmental Policy research division at The School of Public Policy, University of Calgary. Her research is focused on the effects of government regulation and policy on the development of natural resources and energy, and the consequences and trade-offs of energy development.

The new CSUR's Board of Directors 2020-2021 is as follows:

- **Bill Whitelaw**, JWN Energy Group
- **Dr. Brad Hayes**, Petrel Robertson Consulting Ltd.
- **Dr. Brendan Galloway**, Petronas Canada
- **Carolyn Bennett**, GLJ Ltd.
- **Donna Phillips**, Pacific Canbriam Energy
- **Jennifer Keturakis**, Integrated Sustainability
- **Dr. Jennifer Winter**, University of Calgary
- **Randy Rousson**, Birchcliff Energy Ltd.
- **Wally Kozak**, Independent Director

About CSUR: The Canadian Society for Unconventional Resources is a not-for-profit society addressing issues around the development of unconventional oil and gas resources.

Our members include industry, government, universities, financial organizations, and technical consultants.

We organize and host technical workshops, seminars, and field trips to engage our members, and inform them of current technical, regulatory, and business developments.

We enable and facilitate the engagement and collaboration of industry, government, and academic researchers.

We are the leading Canadian source of factual, unbiased technical information on the development of unconventional oil and gas resources.

We involve the public – both directly and indirectly through our members – and encourage them to share scientific knowledge.

With a strong emphasis on improving public awareness, CSUR is the only society to focus exclusively on the full breadth of unconventional resource development and does so by utilizing a multi-disciplinary approach.

CSUR team looks forward to working with the new BOD!
